General repairs and assembly of calenders machines and their equipment

General repairs and assembly of tyre building machines

GOMS

General repairs and assembly of mixing lines for the production of rubber compounds

General repairs and assembly of curing presses for production passenger and truck tyres

GOMS

General repairs and assembly of curing presses for production of conveyer belts

General repairs and assembly of extrusion machines and cooling lines for production of rubber compounds

General repairs and assembly of equipment for production of rubber hoses

Servicing, Reconditioning and Reconstruction performed to customer specification

Production of machinery such as the Grinder of the tyres

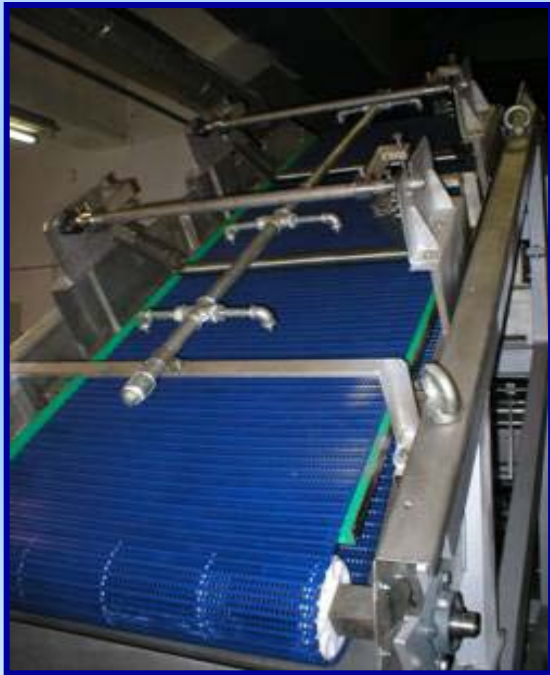

GOMS

Production of Gravitational Feeding Line

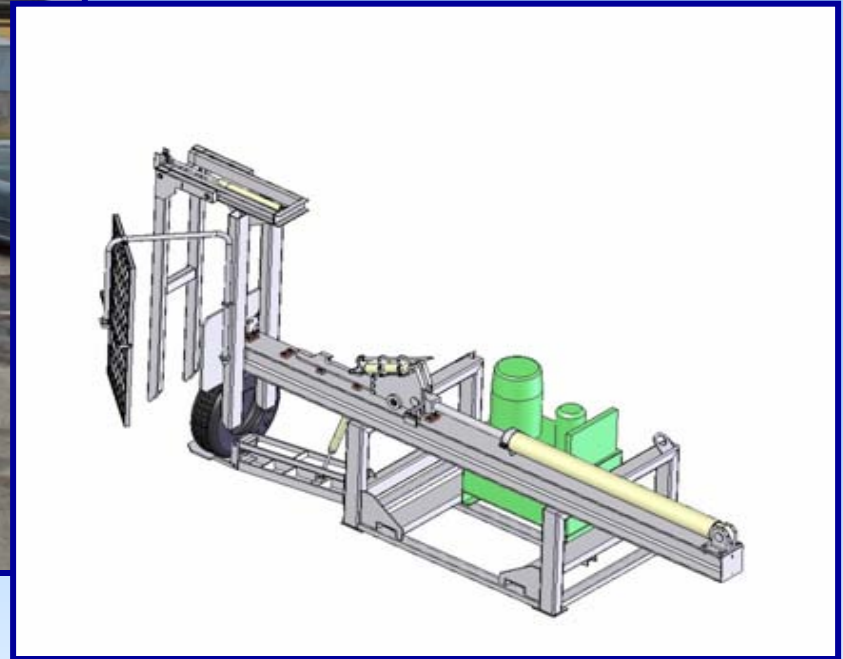

Production of Cooling and Conveyor systems for Extruded Rubber Profiles

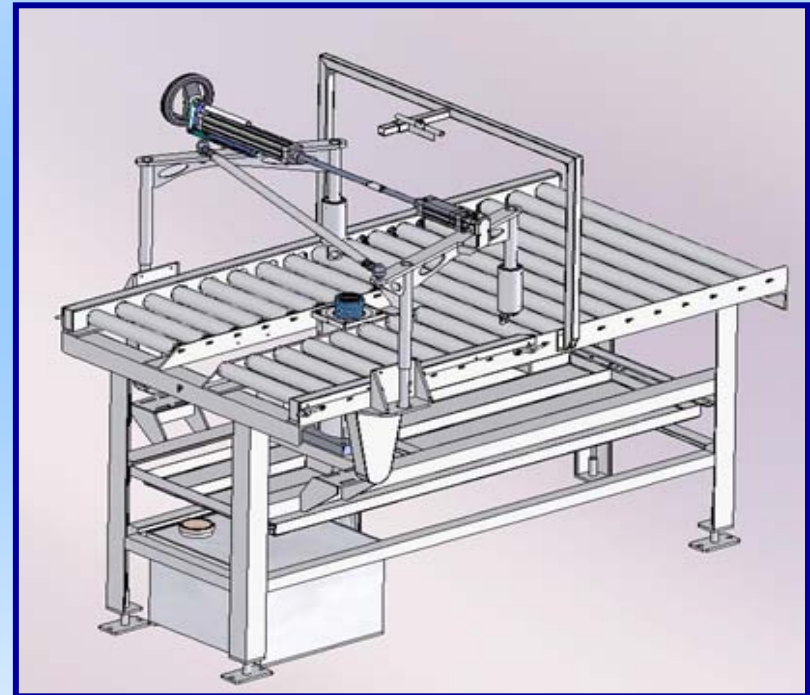

Production of Cooling Lines for Rubber Belts

Production of machinery for the Chunking of Wire Beads

Production of Lubricating Equipment for passenger tyres

GOMS

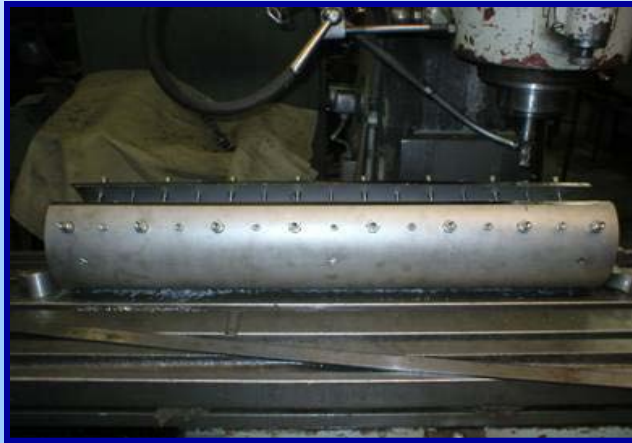

Production of steel frameworks and constructions of factory buildings, sheathing of the halls using sandwich system

Production of switchgear, wiring and general electrical installations for technological equipment and buildings

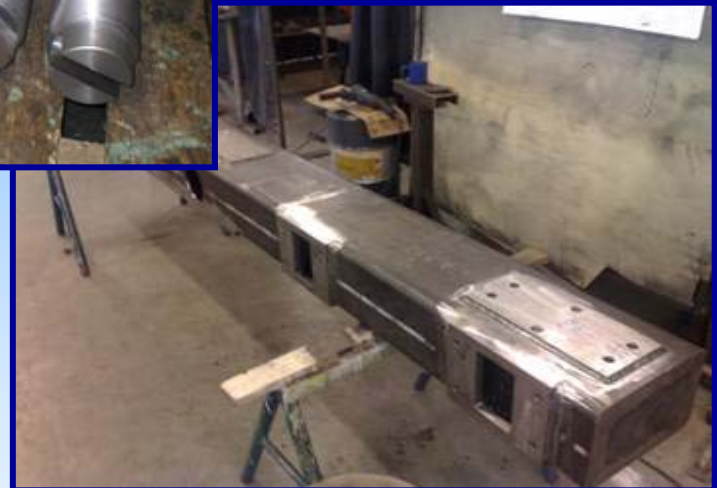

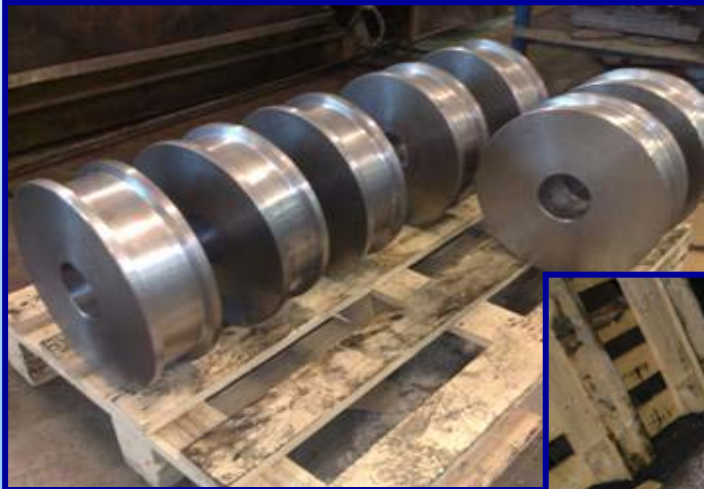

Production of production of various Technological Constructions

GOMS

Custom Metal Work

Activity outside of home country, participation in overseas projects

Our most important customers include:

- Matador, a.s. Púchov,
- Continental Matador Rubber, a.s. Púchov,
- Konšrukta Industry, a.s. Trenčín,
- Vipotest, s.r.o. Púchov,
- Alfagomma, s.r.o. Bratislava,
- Tovogomma, S.p.A. Italian,
- KCM Espanol,
- ATC Addis Ababa, Ethiopia.
